Education

University of Ottawa
Sept. 2014 - May 2018

Bachelor of Science in Computer Science
Minor in Management

Experience

Rubikloud
May 2017 - Aug. 2017

Software Developer Intern
Developed comprehensive UI/UX autotesting scripts using Selenium.
Implemented data validation of front-end information using PostgreSQL and Java.
Improved code structure of front-end application in React to facilitate testing.

DLS Technology
May 2016 - Aug. 2016

Front-End Developer Intern
Refactored in JavaScript, a client-facing web application to be maintainable and scalable.
Redeveloped the same application to be fully responsive and use updated libraries.
Designed and translated UI wireframe prototypes into functioning front-end elements.

DLS Technology
May 2014 - Aug. 2014

Technical Support Coordinator
Designed QA coverage workflows using Excel.
Implemented language localization for a web application using JavaScript.
Authored technical internal and client-facing documentation.

Projects

Promotion Manager
for Rubikloud

Organizes and displays vast amounts of retailer promo data. Implemented front-end features, validated query data and designed extensive auto-testing processes.

vKey Device Manager
for DLS Technology

Application for managing mobile-desktop devices. Built a fully responsive, modern UI and enhanced several management and UX features of the application.

Cherrypicker.io
for fun

NBA statistics data visualizations. My role was front-end oriented; to design the UI, develop the data visualizations and implement UX decisions.
